Why Public Art

Over the past 30 years, public art has played an important role in the enhancement of Hawaii's urban environment. This role has been especially evident in Honolulu's historic districts where public art has transformed places in these districts into significant sites of educational, cultural and historic value to the State of Hawai'i.

The outstanding public art collection in these districts has been produced by the State Foundation on Culture and the Arts under its Art in Public Places Program, by other governmental agencies, and by the private sector. It showcases the talents of exceptional island artists and artists of national and international distinction who have produced impressive works for the viewing enjoyment of Hawaii's people and visitors.

The responsibility to oversee the preservation of historic places in these districts rests with the Historic Preservation Division of the State Department of Land and Natural Resources.

The exhibition of public art in historical settings serves to

enrich the quality of life of Hawaii's people and encourages visitors to view, learn about, share, and experience the unique beauty of Hawai'i and its rich multicultural heritage through the artworks.

Public Art in Hawai‘i

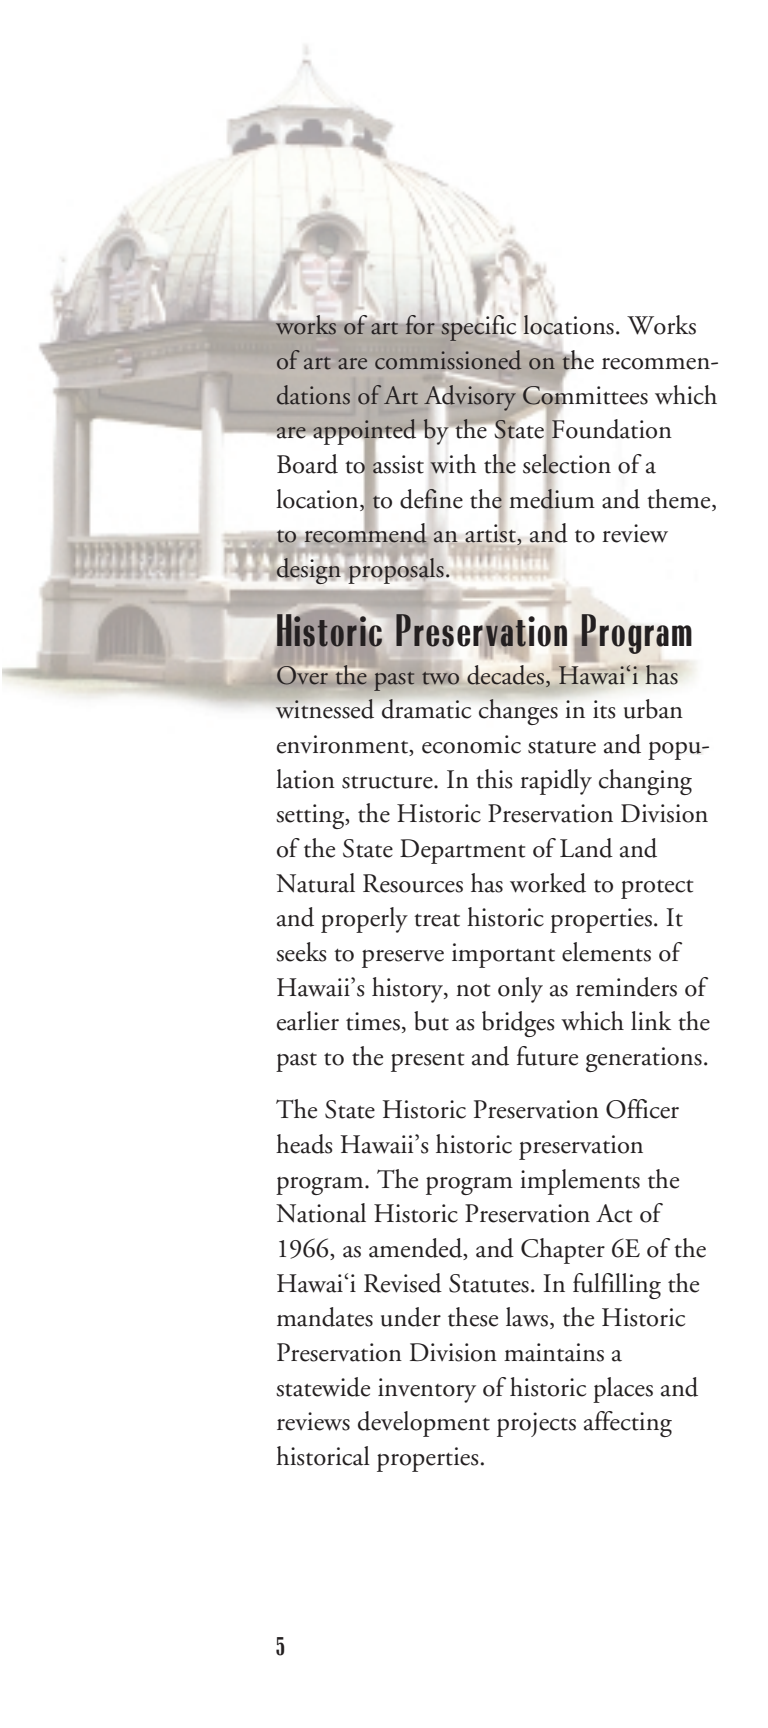

The State Foundation on Culture and the Arts was established by the Hawai‘i State Legislature in 1965 as the official arts agency of the State of Hawai‘i. In 1967, the State Legislature passed Act 298 which founded the Art in Public Places Program. Under the law, the concept of setting aside one percent of construction appropriations to provide a funding base for the acquisition of works of art was established. This set a national precedent as Hawai‘i became the first State in the nation to adopt such legislation. A 1989 amendment of the law created the Works of Art Special Fund, a non-lapsing account, into which all funds set aside for works of art are deposited and from which expenditures are made for purposes consistent with the provisions of Section 103-8.5 of the Hawai‘i Revised Statutes.

Art in Public Places Program

The objectives of the Art in Public Places Program are to enhance the environmental quality of public buildings and spaces throughout the state for the enjoyment and cultural enrichment of the public; to cultivate the public’s awareness of visual arts in various media, styles, and techniques; to acquire, interpret, preserve, and display works of art expressive of Hawai‘i, the multicultural heritages of its people, and the creative interests of its artists.

The Art in Public Places Program acquires completed, relocatable works of art, and commissions artists to create original

works of art for specific locations. Works of art are commissioned on the recommendations of Art Advisory Committees which are appointed by the State Foundation Board to assist with the selection of a location, to define the medium and theme, to recommend an artist, and to review design proposals.

Historic Preservation Program

Over the past two decades, Hawai'i has witnessed dramatic changes in its urban environment, economic stature and population structure. In this rapidly changing setting, the Historic Preservation Division of the State Department of Land and Natural Resources has worked to protect and properly treat historic properties. It seeks to preserve important elements of Hawaii's history, not only as reminders of earlier times, but as bridges which link the past to the present and future generations.

The State Historic Preservation Officer heads Hawaii's historic preservation program. The program implements the National Historic Preservation Act of 1966, as amended, and Chapter 6E of the Hawai'i Revised Statutes. In fulfilling the mandates under these laws, the Historic Preservation Division maintains a statewide inventory of historic places and reviews development projects affecting historical properties.

Queen Lili'uokalani

Hawaii’s Legacy

The Hawaiian Islands, first inhabited soon after the birth of Christ by Polynesians from the South Pacific, were forged into a single kingdom by Kamehameha I in 1795. The Monarchy he established was overthrown almost a century later in 1893 during the reign of Queen Lili‘uokalani. After a short period as a Republic, Hawai‘i was annexed by the United States in 1898 and became the Territory of Hawai‘i in 1900. Hawai‘i finally became the 50th State of the United States of America in 1959.

The following historic periods and the royalty who ruled during the Monarchy Period are identified to enable one to better understand and appreciate the works of art and historic places listed in this brochure.

Hawaii’s Historic Periods

1795–1893	The Monarchy Period
Reign	King/Queen
1795–1819	King Kamehameha I

Major Art Centers • ISLAND OF O‘AHU

The major art centers on the Island of O‘ahu are concentrated in the Central Honolulu Area and on University of Hawai‘i campuses in Honolulu and outlying districts as indicated on the following map.

Bishop Museum

These art centers include the Bishop Museum, the Contemporary Museum, and the Honolulu Academy of Arts. The Bishop Museum is noted for its Hawaiiana collection, the Contemporary Museum for its collection of modern art by artists of local, national and international reputation, and the Honolulu Academy of Arts for its extensive collection of Asian, Italian Renaissance and contemporary art.

The art centers on University campuses include artworks exhibited in galleries, in various buildings, and sculptures located on campus grounds. They also include historic places listed on the National and Hawai‘i State Registers. Information on artworks and places located on campuses may be obtained from campus information centers.

The art districts—the Capitol, the Downtown, and the Chinatown Districts—include concentrations of significant public art, and historic places. Brochures describing walking tours in these districts to view artworks and historic places are available at visitor information centers, the State Foundation on Culture and the Arts, and the State Historic Preservation Division.

This Brochure

This brochure recognizes significant public art, historic places and prominent buildings located within the Downtown and Chinatown Districts in Honolulu. The specific locations of these districts on O‘ahu are shown on the foregoing island map. To view these public art and historic places in an organized and timely manner, the Downtown District has been divided into three sectors — each with a walking tour. The Chinatown District, which abounds with historic places, is proposed to be viewed in a single tour examining many unique examples of public art and historic buildings.

First Hawaiian Center
The Contemporary
Museum Downtown
Gallery

Both publicly and privately funded artworks are considered in this brochure. The artworks shown to be located in building interiors have limited viewing hours and the accessible hours noted should be considered when embarking on particular tours. The normal hours of operation of government offices are from 7:45 a.m. to 4:30 p.m.

The approximate duration of each tour has been noted but the times listed could vary considerably dependent upon the depth of one's personal interest in public art, historic places, and prominent buildings. Also, the time consumed in participation of guided public tours must be added to the duration specified.

With a substantial number of public art and historic places concentrated within these two districts, walking is the most effective way to view them. If the availability of time is very critical, the Merchant Street Sector tour may be found to be the most rewarding tour. The most interesting tour may be the Chinatown tour. One should attempt to walk as many tours as possible as each offer artworks of varying types, styles, and media and historic places which display authentic and exciting glimpses of different periods of Honolulu's past.

Prominent modern buildings featured in the walking tours of the Downtown District include the First Hawaiian Tower which contains the Downtown Gallery of The Contemporary Museum, and the Financial Plaza of the Pacific where major works of art embrace its outdoor spaces.

Located between the Hawai'i Capitol Special District (Capitol District) and the Chinatown Special District (Chinatown District), the Downtown District (or Central Business District) contains many buildings listed on the Hawai'i and National Registers of Historic Places. This district at one time was characterized by numerous distinguished examples of beaux arts design from the early twentieth century; however, it lost much of its historic elements when the area was redeveloped to accommodate the higher density needs of the central business district.

Many distinguished glimpses of the old, fortunately, still intermingle with the new within the district and major open spaces and public art—many funded by the private sector—further grace the area.

To enjoy the public art, historic buildings, and major open spaces within the district in an organized time-effective manner, three walking tours of the Downtown District have been developed.

The Downtown District offers very limited public parking facilities during normal business hours and their locations are indicated on the following map. The use of public transportation for access to the Downtown District as discussed in the inside back cover of this brochure is strongly recommended.

Chinatown vendor

Chinatown District

In addition to its historic role in the growth of the City and its architectural significance as reflected in its placement on the Hawai'i and National Registers of Historic Places, the Chinatown District, the oldest in the nation dating back to 1860, reflects a dynamic ethnic population and business community.

The architectural character of the district, reminiscent of the period from the late 1880s to the 1940s, is particularly noteworthy. Interspersed among the historic places in the Chinatown District are public art with ethnic origins which relate to the historic character of the district.

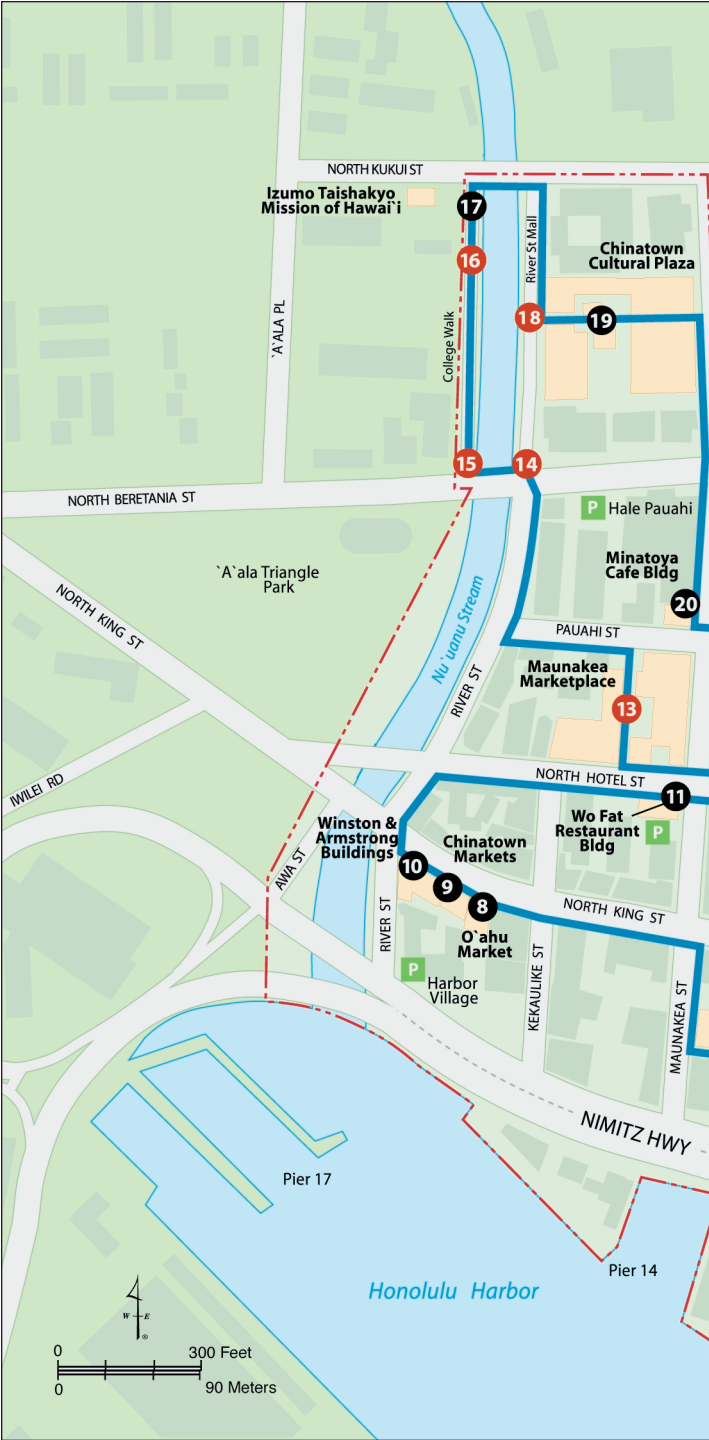

To view the public art and historic places in an organized time-effective manner, a walking tour of the Chinatown District as delineated on the following map has been developed. The tour will take approximately 105 minutes.

The Chinatown District offers limited public parking facilities during normal business hours and their locations are indicated on the following map. The use of public transportation as discussed in the inside back cover of this brochure is strongly recommended.

Safety Advisory

Touring the old Chinatown District is relatively safe during the day; however, reasonable precautions need to be exercised such as travelling in groups. Nighttime touring should be undertaken only with an experienced tour guide.

Thank You For Your Interest

The public art in the Downtown and Chinatown Districts consists largely of works of the City and County of Honolulu and of private corporations. The art collection of the State Foundation on Culture and the Arts has been installed with specific construction projects and, on O‘ahu, is largely found in the Capitol District, University campuses, and the Honolulu International Airport. Others are located at public schools, libraries, hospitals, and regional parks.

The State Foundation on Culture and the Arts will prepare brochures showing major concentrations of works elsewhere on O‘ahu and on the Neighbor Islands. Information on the availability of these brochures or the location of artworks may be obtained by calling the State Foundation at (808) 586-0304. Additional information on historic sites may be obtained by calling the State Historic Preservation Division at (808) 587-0047.

Your interest in public art and historic places in Hawai‘i is welcomed and much appreciated. We hope you enjoyed these tours and that they helped you to better understand and appreciate the history, the culture, and arts of Hawai‘i.

Transportation Advisory

Due to very limited parking facilities available in the Capitol, Downtown, and Chinatown Districts during regular business hours Monday through Friday, visitors from Waikīkī are encouraged to use public transportation systems to reach the Downtown area for the public art and historic places walking tours. Ample parking spaces are available on weekends and State holidays; however, since the government buildings are then closed, works of art within such facilities cannot be viewed.

The locations of public parking facilities available in the Capitol District are identified on the walking tour maps. Additional parking facilities are available in private structures but they may be very expensive.

Numerous buses serve the Downtown area directly from Waikīkī on Kūhiō Ave. (Nos. 2, 13, 19, 20, 47); others serve the Downtown area via the Ala Moana Center (No. 8) where a transfer to one of many Westbound buses (Nos. 6, 55, 56, 57, etc.) on Kona St. or Ala Moana Blvd. is required. Normally, the trips from Waikīkī to Downtown Honolulu take about 30 minutes.

Return trip buses Eastbound from Downtown to Waikīkī (Kūhiō Ave.) may be caught on Hotel St. (No. 2, 13); King St. (No. 47); or Ala Moana Blvd. (Nos. 19, 20). You may also board any bus passing through Downtown (Hotel, King, Bishop Streets) bound for Ala Moana Center and transfer there to a Waikīkī bound bus (No. 8).

You may want to consider the Waikīkī Trolley for a unique experience in travelling from Waikīkī to the Capitol, Downtown, and Chinatown Districts. Call (808) 596-2199 for route and schedule information.
